

DRAIN-B

HDPE Based, Protective Drainage Dimple Board

Description

DRAIN-B is high density polyethylene (HDPE) based, plant roots and decay resistance drainage dimple board to protect curtain walls against water and moisture by separated from the earth. It is produced as 400, 500 and 600 g/m².

Fields of Application

It is used for the protect water and heat insulation systems which applied on foundation and curtain wall of buildings.

Features and Benefits

- Provides uniform distribution of the pressure given by earth.
- Resistant to plant roots and decay.
- Prevents any damage on the waterproofing that occur while the land case.
- Allows the breath of buildings.

DRAIN-B

HDPE Based, Protective Drainage Dimple Board

Application Procedure

Application Method

DRAIN-B is inserted as 15 cm above from the waterproofing layer and bubbles it has faced with application surface. **DRAIN-B** is immobilized on the application surface as 20 cm distance or engaged on the surface with pressure profile. Waterproofing surface must be protected during the montage. At least 20 cm overlapping and additional fastening equipment is need on the plate joint areas.

Packaging

2m x 20m roll

Shelf Life

Unlimited shelf life in proper storage conditions.

Storage

The materials must be stored on smooth surface and indoor spaces.

Cautions / Limitations

- Do not apply in freezing conditions or during precipitation.
- Protect applied materials from rain, freezing, foot traffic.
